BULLETIN
TECHNICAL

ISSUANCE DATE
August 8, 2025

ISSUER: Joseph Ackroyd, P.E., CFM 
Assistant Commissioner
Technical Affairs & Code Development

PURPOSE: This Bulletin clarifies the updated filing requirements for certain electrical installations subject to plan examination as triggered by the enactment of Local Law 128 of 2024.

SUBJECT(S): Electrical work, Electrical filing, Electrical Plan Review (EPR)

RELATED/SPECIAL INFORMATION: Local Law 128 of 2024

I. PURPOSE

The purpose of this bulletin is to clarify electrical work requirements set forth in LL 128 of 2024. Section 110.2(B) of the 2025 NYC Electrical Code requires electrical plan review (EPR) for certain electrical installations. Applicants are required to submit technical documentation to the Department's Electrical Plan Review Unit prior to filing for an electrical permit in DOB NOW. These requirements differ from those of 1 RCNY 4000-01 and this rule will be updated to coincide with the effective date of the 2025 NYC Electrical Code.

II. ELECTRICAL WORK REQUIREMENTS

To support the consistent and efficient review of submissions, the Department has issued a companion guide entitled: Electrical Work Guide for the 2025 NYC Electrical Code. This guide outlines the required contents, format, and review criteria for electrical plan review filings. Refer to the [Electrical Work Guidance Document](#).

The document can be found at www.nyc.gov/assets/buildings/pdf/elect_work_guidance.pdf.
